Yihong (yihong0618)

Dalian, Liaoning / zouzou0208@gmail.com / (+86)13149872429 / github.com/yihong0618 / Website / Blog

About Me

- Microsoft MVP and Apache OpenDAL committer; open-source developer with 6K GitHub followers and 30K+ stars across projects
- Community Evangelist for GreptimeDB and OceanBase
- Creator of multiple projects with 1K+ stars and core contributor to vscode-leetcode, stravalib, autocut, DB-GPT, Dify, OpenDAL, and more
- Full-stack engineer with 7 years of Python experience, specializing in backend development and CI/CD automation
- Experience building LLM products from zero to one
- Maintainer of multiple open-source projects, with expertise in data visualization and generative AI; creator of xiaogpt
- Speaker and instructor at multiple open-source events

Work Experience

Developer Relations
2026.08 - Present

NVIDIA

- Lead developer relations for cuVS, cuDF, Sirius, and other projects

AI/LLM Project Lead
2024.11 - 2026.07

Xenera

- Built and led the company's LLM team
- Led technology selection, development, and proof-of-concept delivery for the company's LLM initiatives

Database Development Engineer (Greenplum / PostgreSQL)
2022.3 - 2024.11

VMware

- Developed and maintained multiple Greenplum extensions, including pgml and pgvector
- Led the adoption of pgvector in Greenplum
- Helped bring pgrx and pgml to Greenplum
- Redesigned CI/CD pipelines for Greenplum extensions to improve maintainability
- Built multiple proof-of-concept projects integrating ChatGPT with Greenplum and PostgreSQL

Network Automation Engineer
2019.10 - 2022.3

Cisco

- Built multiple network automation tools in Python
- Developed Django-based maintenance tools for network operations teams
- Introduced AI-assisted diagnostics for network automation

Software Developer / Instructor
2018.9 - 2019.10

Neusoft Education Technology Group

- Developed educational software for project-based training and hands-on coursework
- Delivered Python training programs both on and off campus

Data Analyst / Game Operations
2015.4 - 2018.4

Kingsoft (Seasun Games)

- Designed analytics and event tracking and performed data analysis for "Xiaomi Gunfight"
- Conducted data analysis and produced reports for "MAT"
- Conducted competitor and market research to inform the planning and development of multiple projects
- Helped establish and develop Seasun's Dalian VR Lab and conducted early-stage game research

Technical Stack

Python | Rust | Go | DevOps | React | Open Source | Generative AI | PostgreSQL | Marketing Operations | Data Analysis | Data Visualization

Education

Shenyang University of Technology
2012 - 2015

Master of Engineering, Mechanical Engineering

Open Source Projects

running_page stars 4.5k

github.com/yihong0618/running_page

Build your own running homepage

bilingual_book_maker stars 9.6k

github.com/yihong0618/bilingual_book_maker

Create bilingual EPUB books with AI-powered translation

xiaogpt stars 6.9k

github.com/yihong0618/xiaogpt

Bring ChatGPT and other LLMs to Xiaomi AI Speakers

Kindle_download_helper

github.com/yihong0618/Kindle_download_helper

Download all your Kindle books

GitHubPoster stars 1.9k

github.com/yihong0618/GitHubPoster

Turn anything into a GitHub-style SVG poster or skyline

gitblog stars 1.6k

github.com/yihong0618/gitblog

A personal blog powered by GitHub Issues and Actions

epubhv stars 544

github.com/yihong0618/epubhv

Convert EPUB books between vertical and horizontal layouts

github-readme-stats stars 159

github.com/yihong0618/github-readme-stats

Generate GitHub profile stats with GitHub Actions

GreptimeDB(committer) stars 6.6k

github.com/GreptimeTeam/greptimedb

Dify(Contributor) stars 153.2k

github.com/langgenius/dify

cpython(Contributor) stars 74.7k
